

STATE OF HAWAII  
DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES  
INFORMATION AND COMMUNICATION SERVICES DIVISION

HONOLULU, HAWAII

September 17, 2015

ADDENDUM A

REQUEST FOR PROPOSALS  
NO. RFP-16-002

TO  
PROVIDE LICENSE FOR A MAINFRAME SORT UTILITY FOR THE  
STATE OF HAWAII

The following additional information is hereby provided as answers to questions submitted by potential bidders:

QUESTION: Will the RFP team be open to revisions to the State of Hawaii General Conditions? Please see attached red-lined draft of the General Conditions with our requested revisions.

ANSWER: Please refer to RFP Section 3.3, Proposal section 8, for instructions on handling exceptions. Additional instructions regarding exceptions are as follows: 1) each exception must be noted individually as a number item, 2) provide an explanation for each exception and 3) submitting a red-lined document is not acceptable.

QUESTION: To be compatible with CA SORT and CA SRAM it may be necessary to modify JCL or control statement syntax in the existing sort applications. Would this be acceptable?

ANSWER: Modification of JCL is acceptable but if other offers are received that do not require JCL modifications, they may be awarded points under "Technical Solutions" as listed in RFP Section 4. If JCL modifications are required, Offerors shall provide why they are necessary, what needs to be changed, how the modifications technically work, and any additional details that insure that the all facets of the replacement sort software are disclosed. If a detail is not disclosed that causes, in the opinion of the State, the solution to be unacceptably onerous or creates a security problem when the process is audited

by a financial or federal security audit, the State may terminate the contract and switch to another Offeror's solution.
